

Virtana Corporation d/b/a Virtana

Maintenance and Support Services Supplement

Last updated on October 14, 2021

This Maintenance and Support Services Supplement (“Supplement”) states Virtual Instruments Corporation d/b/a Virtana (“Virtana”) current policies and procedures for maintenance and support (“Support Services”) applicable to Virtana WorkloadWisdom, Workload Generator and Test Development Environment (TDE) (“Products”) purchased by you (“Customer”) from Virtana or from Virtana’ authorized resellers or distributors (“Channel Partner”).

1. General Policies

1.1. Payment of Fees Required

Virtana will only provide Support Services for Products for which Virtana has received applicable Support Services fees. For any support or maintenance services not covered by this Supplement, please contact Virtana to discuss our time and materials services offerings. Any additional services not covered by this Supplement provided by Virtana will be subject to Virtana’ then-current, standard terms, conditions and charges.

1.2. Support Period

Unless otherwise agreed to in writing by Virtana, Support Services commence on the date of purchase of the Products and are provided for a period of twelve (12) months thereafter.

Unless otherwise agreed to in writing by Virtana, Support Services will automatically renew for successive annual periods unless Virtana receives written notice of cancellation of an upcoming annual Support Service prior to the renewal date.

1.3. Exclusions

Virtana will have no obligation to provide Support Services:

1. For Products that were altered, modified, mishandled, or damaged by anyone other than Virtana
2. For Products that were not installed, operated, repaired, or maintained by anyone other than Virtana or customers who have received training in accordance with Virtana’ specifications, documentation and instructions
3. On Products that have been misused outside of the environmental specifications for that Product, or operated in an environment, in a manner, or for a purpose for which they were not designed or licensed
4. If a problem is determined to be caused by or originate with a Customer’s or a third party’s network, systems, hardware, software, or other problem beyond the reasonable control of Virtana

5. With respect to Virtana equipment, if the original identification marks have been removed or altered
6. With respect to software which is installed on hardware other than that for which it was licensed
7. For Products that are no longer supported per Virtana' "Product Lifecycle and End Of Life Policy" located at the URL http://www.virtualinstruments.com/corporate_info, or its successor URL designated by Virtana, or the customer support portal or other versioning policy set forth or referenced in this Supplement.
8. If doing so results in a violation of applicable laws or regulations or third-party rights
9. For Products not purchased from Virtana or a Channel Partner
10. If Customer has not installed an Update which corrects the reported problem
11. For Unsupported Programs or Evaluation Products, including any experimental or beta releases of the Products.

1.4. Product Lifecycle and End of Life Policy

Virtana' Product Lifecycle and End Of Life Policy is designed to help Customers manage the end-of-life transition for the Products. Support is provided for Products that are Current, Limited Distribution, or Limited Support. Support is not provided for Products that are declared End of Life.

1.5. Reinstatement of Support Services

Unless otherwise agreed to by Virtana in writing, if Support Services lapse, a reinstatement process will apply. Customer may be granted a thirty (30) day grace period after the termination of Support Services to complete the renewal of an upcoming Support Services plan, and not be considered lapsed if the Customer is taking prompt and diligent steps to complete such renewal process.

If Support Services are not reinstated for the entire purchased Product set, or are purchased for a subset of the Products ordered, Support Services pricing discounts may be eliminated and renewal pricing set at then-current list pricing.

Unless otherwise agreed to by Virtana in writing, reinstatement requires payment of Support Services fees for the lapsed period (that is, the period commencing on the date of termination of prior coverage through the reinstatement date) plus the one (1) year period from the reinstatement date forward. A reinstatement fee of an additional 25% of lapsed period fees may also be required.

For hardware Support Services, reinstatement may be subject to a Product audit to determine whether the hardware is in proper working order. The hardware Product audit may be conducted either by returning such Products to Virtana or by an onsite visit by Virtana professional services. In either case, Customer will be responsible for applicable fees to be calculated at Virtana' then-current time and materials rates, plus applicable reasonable shipping and handling and/or travel expenses related to the audit. Customer is responsible for all costs associated with returning all hardware Products to proper working condition prior to reinstatement.

1.6. Customer Responsibilities

To enable Virtana to service Customer, Customer agrees to promptly and at no charge to Virtana:

1. Notify Virtana when Products fail.
2. Provide remote access to the Products, such as through the use of desktop sharing technology.
3. Promptly notify Virtana of any changes to, or movement of, the configuration of a Product by anyone other than Virtana. Virtana reserves the right to inspect and evaluate the changes in configuration or location at Virtana' then-current time and materials terms, conditions and rates. Additional Support Services charges, if any, related to any such changes in configuration or location, shall apply from the date the change took place.
4. When handling the Products, at all times follow and comply with best practices with regards to EMP protection as instructed by Virtana.
5. Provide the following when opening a case:
 - Detailed description of the problem
 - Serial number of Product component with the issue, where applicable
 - Copy of project files, workloads and results, where applicable
 - Copy of diagnostic logs, where applicable
 - Customer's assessment of the severity level and impact of the problem
 - An indication of the activity that was being performed when the problem occurred
 - Software version and firmware version of applicable hardware
 - Configuration data
6. For hardware related problems:
 - Provide a contact at the affected site who can work with Virtana to validate the failure. This may include, but is not limited to performing the following under the remote direction of Virtana:
 - Physical inspection of the product
 - Checking and reporting to Virtana the status of indicator lights and display readouts
 - Power cycling the product
 - Inspecting, cleaning, moving cabling
7. Perform the physical replacement of the hardware. This can be accomplished with Virtana or channel partner providing remote support or Virtana professional services at the Customer's expense.
 - Replacement of complete products
 - Replacement of simple Field Replaceable Units (such as SFPs, power supplies and fan trays)
8. Inspect and clean, as required, physical layer SAN components, including cables, cable adapters and SFPs.
9. In rare cases where on-site work by Virtana is required: furnish necessary access to Product and/or facilities to perform on-site Services, if applicable, including providing suitable work space, computers, power, light, phone, software and equipment reasonably required by Virtana.

Failure to comply with these requirements may inhibit or prevent Virtana' ability to provide Support Services.

1.7. Third Party Vendor Support Terms

To receive Support Services, Customer must remain on a supported environment for all pre-requisite or associated products, programs and platforms.

If a vendor retires support for its product, Customer may be required to upgrade to a current certified program, hardware platform, framework, database and/or operating system configuration to continue receiving Support Services from Virtana.

1.8. Unsupported Programs

Virtana is not obligated to perform Support Services for any Products for which Support Services have expired or been terminated ("Unsupported Programs").

Customer may not use any Products purchased or downloaded for trial use, or programs supplied as replacement media, to update any Unsupported Programs.

1.9. Remote Access

Customer agrees to provide Virtana with remote access using desktop sharing technology to supported Product for troubleshooting and diagnostics access when necessary. Customer acknowledges and agrees that accurate Product installation location information is essential to providing Support Services, and that remote access to the Products on Customer's network may be required to diagnose or resolve a support problem.

Customer acknowledges and agrees that if Customer does not provide remote access when requested, Customer will impact Virtana' ability to provide prompt resolution of problems. Customer further acknowledges and agrees that the inability to remotely access the Products will increase the cost to Virtana of providing Support Services, and may result in an increase in Support Services fees to Customer, or in separately billable services.

Virtana will not be responsible for any Product replacement or repair delays caused by the inability to remotely access the Products.

2. 9x5 Support Offering Description

2.1. Support Availability

Support Services are provided Monday through Friday 9am to 5pm Pacific Time Zone US excluding holidays.

2.2. Customer Portal

Virtana provides a web-based support portal for Customers covered by Support Services ("Portal"). The Portal is available on a 24 x7 basis. The Portal provides:

- The ability to open new service requests, provide updates, check incident's status, and close existing service requests
- Announcements of new software and firmware releases
- Customer Alerts
- Product documentation and other technical information
- Opportunity to provide service requests for enhancements

Virtana will provide Customer's technical contacts with unique logins to the Portal for secure access.

Inactive Portal accounts may be deactivated. A Portal is considered inactive if the account was created more than 6 months ago, but Customer has not logged in within the last 6 months. Portal accounts that were deactivated can be reactivated upon request by sending an email to workloadwisdom.support@virtana.com.

2.3. Email Support

Customer's technical contacts will have access to email support during the hours described in the section entitled "Support Availability." Customers may use email to open new service requests, provide updates, check the status on existing service requests, and close existing services requests. Customers may also use e-mail to send supporting documents for Service Requests logged by other methods.

Please direct all Support Services e-mail messages to Virtana to workloadwisdom.support@virtana.com.

2.5. Technical Contacts

Customer may designate two (2) named individuals as "Technical Contacts". These Technical Contacts will be the sole liaison between Customer and Virtana and will be

responsible for (i) overseeing Customer's Support Services request activity, and (ii) developing and deploying troubleshooting processes within Customer's organization.

In order to log support calls with Virtana Customer's technical contacts must meet the following criteria to ensure that questions are initially vetted by Customer through qualified technical personnel. The technical contacts must:

1. Be trained on the Virtana Product
2. Understand the installation/configuration of the Virtana Product in that environment
3. Determine if the problem can be reproduced to facilitate troubleshooting
4. As required, act as an interface between the end user and Virtana to interpret and give context to end user questions and issues
5. Collect log files and other needed information as requested by Virtana support
6. Implement changes and recommendations made by Virtana

If there is a need to have more than two (2) Technical Contacts, Virtana may, at Virtana's discretion, allow a limited number of additional Technical Contacts, provided those additional Technical Contacts meet the criteria listed above.

Virtana may review service requests logged by Customer's Technical Contacts and may recommend specific training to help avoid service requests that may be prevented by such training.

To avoid interruptions in Support Services, Customer must notify Virtana whenever Technical Contact responsibilities are transferred to another individual.

2.6. Severity Levels

For each service request, Virtana will assign an appropriate severity level according to the applicable business impact. Virtana will follow the guidelines below to assess the situation and designate the appropriate severity level.

Severity Level	Definition
Severity 1 (Critical)	<ul style="list-style-type: none"> • An incident that results in a critical business impact for the customer's test environment on which their project is absolutely dependent. • Customer experiences a complete or substantial loss of the test environment from VI product(s) and that loss prevents the Customer from being able to proceed with a project or is causing a critical business impact.
Severity 2 (Significant)	<ul style="list-style-type: none"> • Customer experiences a partial loss of the test environment from VI product(s) and that loss prevents the Customer from being able to proceed with a project or is causing a business impact • An incident that results in a moderate business impact for the customer's test environment on which their project is dependent. • Customer experiences a partial loss of functionality of the test environment from VI product(s) and that loss impacts their ability to proceed with a project or is causing a critical business impact.
Severity 3 (Standard)	<ul style="list-style-type: none"> • Customer experiences a minimal loss of the test environment from VI product(s) and that loss impacts the Customer project • Customer experiences interruption or slowness of certain non-essential functions within the VI product(s)
Severity 4 (Low)	<ul style="list-style-type: none"> • An incident that results in no business impact for a Customer. • Customer experiences no loss of service and the incident has no significant effect on the usability of the system. • This level typically involves questions, comments, product training and enhancement requests.

2.7. Response Targets

For all cases logged with Virtana through the Portal or by email or telephone, Virtana will use reasonable efforts to respond to Customer within the time frame below.

Incident Severity Level	Response Target
Severity 1	4 business hours
Severity 2	1 business day
Severity 3	3 business days
Severity 4	5 business days

2.8. Program Updates

Except as otherwise defined in Virtana' agreement with Customer, an "Update" means a subsequent release of the program which Virtana makes generally available to customers current in the payment of Support Services fees at no additional charge. Updates do not include any release, option or future program that Virtana licenses separately, and does not include new products. Customer shall be responsible for copying, downloading and installing the Updates on all Products covered by a Support Services offering.

Upon use of an Update, Customer agrees to remove and make no further use of any prior versions of the Products, and to protect such prior versions and Updates from disclosure or use by any third party by use of the same degree of care Customer use to protect Customer's own information of a similar nature and importance.

2.9. Product Changes

In the course of performing Support Services, Virtana may make changes to the Products: (i) upon reasonable notice to Customer, when such changes do not adversely affect interchangeability or performance of the Products; (ii) when Virtana believes changes are required for purposes of safety, performance, or reliability; or (iii) when Virtana is required by law, regulation or other governmental order to do so. Customer agrees to give Virtana reasonable access to the Products for such purpose. Product changes include, but are not limited to, new firmware, updates or component changes that can be applied to the equipment.

3. Hardware Support

3.1. General Description

Virtana offers the following Support Services for hardware Products:

- Preventive Maintenance: When appropriate, Virtana may notify Customer proactively of maintenance steps that may prevent future problems.

- **Corrective Maintenance:** Virtana may take corrective action to restore equipment to normal operations. Virtana will work closely with Customer to diagnose the problem, plan the proper corrective action and may require remote diagnostic access for detailed analysis and troubleshooting.

For Products in Limited Distribution, replacement parts or replacement units may be in the form of Current versions.

For Products in Limited Support, Virtana will make reasonable efforts to troubleshoot and take corrective action. Repairs and replacements will be made only as parts for that version are available. Current version replacements are not provided for Products under Limited Support.

3.2. Software Error Corrections

Virtana will use its reasonable efforts to correct any reproducible programming error in the Product software attributable to Virtana with a level of effort commensurate with the severity of the error, provided that Virtana shall have no obligation to correct all errors in the software Product.

Upon identification of any programming error, Customer agrees to notify Virtana of such error and shall provide Virtana with enough information to reproduce the error. Virtana shall only attempt to correct errors that are (1) attributable to Virtana and (2) reproducible by Virtana on unmodified Product software as delivered to Customer.

Software error corrections for Products in Limited Distribution will be made available only in the latest maintenance release of that Product minor version. Software error corrections for Products in Limited Support will be made to the latest maintenance release of the latest minor release of that Product major version.

3.3. Return Materials Authorization (RMA) Process

To initiate the RMA process, Customer must first open a support case with Virtana. If Virtana verifies that the Product is likely to be defective, Virtana will issue Customer an RMA number. All returned Products or parts require an RMA number. Customer may obtain an RMA number by contacting Virtana or logging a request via the Portal. The assignment of an RMA number requires Customer to fill out an RMA form which Virtana will supply. Virtana will provide specific shipping instructions along with the RMA number.

All hardware Products that require repair must be returned to Virtana in the original packaging, or packaging equivalent to or better than the original packaging with respect to movement restriction, padding and strength. Customer is responsible for removing and retaining any SFPs or blades or chassis which should not be included in the shipment.

Customer is responsible for all shipping and handling fees associated with returning a Product to Virtana and assume the risk of damage or loss in transit.

Virtana may replace or repair the Product with either a new or reconditioned Product.

Customer is responsible for the physical replacement of the hardware. This can be accomplished with Virtana providing remote support or contracting with a 3rd party provider or Virtana Services at Customer's expense.

3.4. Advance Replacement Program

For RMA's issued within the first thirty (30) days of the applicable warranty period, Virtana will use commercially reasonable efforts to ship an advance replacement unit via express delivery. For international shipments, delivery times may depend on international customs clearing and export/import laws and regulations. Advance replacement may not be available for all Products.

Customer is required to return the defective unit within thirty (30) days after Virtana ships the replacement. If Customer does not return the defective unit within this period, Virtana will invoice Customer, and Customer agrees to purchase the replacement unit at the then-current list prices for such Product.

4. Changes to this Supplement

Please note that Virtana may make changes to this Supplement from time to time as technology development drives changes in our Products and practices. The terms of this Supplement as of the date Customer initially places Customer's order for Support Services will apply without modification for the covered annual Support Services period.

Thereafter, if Customer renews or reinstates Support Services, the then-current terms in this Supplement at the time of such renewal or reinstatement shall apply with respect to each applicable renewed or reinstated period, unless Virtana and Customer agree otherwise in writing.
